REVIEW/SYNTHÈSE

David A. Lovejoy Peptide hormone evolution: functional heterogeneity within GnRH and CRF families 1

ARTICLES

Ling Liu, Daniel S. Maillet, J. Roger H. Frappier, Karen d'Ailly, David B. Walden, and Burr G. Atkinson Characterization, chromosomal mapping, and expression of different ubiquitin fusion protein genes in tissues from control and heat-shocked maize seedlings 9

Thomas J. Logan, Kelly L. Jordan, and David J. Hall Constitutive expression of the E2F1 transcription factor in fibroblasts alters G0 and S phase transit following serum stimulation 21

Y. Vijayaraghavan and M. Kapoor Disruption of the NAD^+-specific glutamate dehydrogenase gene of *Neurospora crassa* by means of the RIP (repeat-induced point mutations) process 29

Y. Vijayaraghavan and M. Kapoor Repeat-induced point mutations of *HSP*80 gene of *Neurospora crassa*: methylation of duplicated DNA sequences in the vegetative state 41

Odile Clément-Chomienne and Michael P. Walsh Identification of protein kinase C isoenzymes in smooth muscle: partial purification and characterization of chicken gizzard PKCζ 51

Doug W. Chan, Christopher H. Mody, Nicholas S.Y. Ting, and Susan P. Lees-Miller Purification and characterization of the double-stranded DNA-activated protein kinase, DNA-PK, from human placenta 67

Linh The Nguyen, Guy Beauregard, Sylvain Tessier, Pierre Allard, Azeddine Atfi, Yves Durocher, Alcide Chapdelaine, Michel Potier, and Simone Chevalier Radiation inactivation and in situ renaturation of protein tyrosine kinases reveal a major 50-kDa enzyme as part of a membrane complex present in dividing but not in resting prostatic epithelial cells 75

Michael A. McGuckin, Peter L. Devine, and Bruce G. Ward Early steps in the biosynthesis of MUC2 epithelial mucin in colon cancer cells 87

H.X. Wang, T.B. Ng, V.E.C. Ooi, W.K. Liu, and S.T. Chang A polysaccharide–peptide complex from cultured mycelia of the mushroom *Tricholoma mongolicum* with immunoenhancing and antitumor activities 95

Edward K. Koepf and Leslie D. Burtnick Multiple pathways for denaturation of horse plasma gelsolin 101

Christian H. Schleicher and José A. Santomé Purification, characterization, and partial amino acid sequencing of an amphibian liver fatty acid binding protein 109

Marica Bakovic and H. Brian Dunford pH and temperature dependence of the rate of compound I formation from the reaction of prostaglandin endoperoxide synthase with hydrogen peroxide 117

NOTE

Patrick Vernet, Nicole Rigaudiére, Norbert Ghyselinck, Jean Pierre Dufaure, and Joël R. Drevet In vitro expression of a mouse tissue specific glutathione-peroxidase-like protein lacking the selenocysteine can protect stably transfected mammalian cells against oxidative damage 125
